## [Official journal of the International Environmental Communication Association](#)

[Environmental Communication: A Journal of Nature and Culture](#) examines theories, practices, and processes of communication as they relate to the environment around the world and focuses on three main goals:

- **Develop theoretical concepts, models, or formulations** that uniquely explain or illuminate the material and symbolic dimensions of human interfaces with the non-human life world.
- **Present and engage in conversation multiple approaches to exploring environmental communication**, examining important issues, such as the promotion of “just sustainability” and climate change communication.
- **In our PRAXIS section, exploring the tensions and possibilities between conventional academic scholarship and more participatory “action research”** that are experienced by many scholars who work in environmental communication.

[Click here](#) for the full aims and scope.

Editor:

**Stephen P. Depoe**, *University of Cincinnati*

### Submissions

[Environmental Communication](#) is looking for high quality papers on a continuous basis in order to build a strong and highly cited publication. We have assembled an outstanding international [Editorial Board](#) to provide informed and thorough reviews of your work. All essays for submission should be made via *Environmental Communication's* [ScholarOne manuscripts site](#). For further information, including [Instructions for Authors](#), please visit the journal's [homepage](#).

### Special Issue Call for Papers:

#### Special Issue: Visual Environmental Communication

Volume 6, Issue 4 (December, 2012)

While there is a growing body of research on media coverage of the environment deploying a range of text focused approaches, there has not been a corresponding body of work on visual environmental communication...

For more information [click here](#)

#### Special Issue: The Symbolic Transformation of Landscape Space: The Role of “Place” in Environmental Communication

Volume 7, Issue 1 (March, 2013)

This special issue focuses on the extent to which place—or the cognitive and affective attachments people have for particular or general types of spaces spread across landscapes...
